

ATG Portal Set-up Form

To set-up a new Fuelcraft ATG Portal, we require some details to load into our online server. Please complete all sections below, starting with business details and then the nomination of an ATG Portal Administrator/User. The ATG Portal Administrator/User will be in charge of the portal and be the contact point for all related communications. Additional users can be added to view the portal. Please complete the 'Additional ATG Portal Users Form' to offer access to your portal for these people.

Additionally, we also require your facilities details to be loaded into the ATG portal. The facilities location, the number of tanks on the site and the contents of each tank, along with the tanks Maximum Capacity, Safe Fill Level and Minimum Fill Level need to be provided, along with the ATG set-up protocols. This information will be used to link your ATGs data and correctly represent the feed, allocating it to the right facility and tank. Please complete the 'Facility Upload Form' to supply us this important information. Each facility will require its own form.

CUSTOMER ATG PORTAL ACCOUNT DETAILS
